<u>Final result</u>

Observations:

We saw a bunch of different birds coming to the bird feeder, but we did not manage to take any picture of them. We have only been able to recognize some sparrows, cardinals, crows, and pigeons. We do not know which species were the other birds. One morning we saw a woodpecker on the tree where the house is hanging. In addition, we have been able to take a picture of a squirrel trying to steal the bird food. The squirrel has been shaking the house to make the food fall on the ground and then he went on the ground to eat.
